

Project – Financial Complaints Dashboard

Introduction:

This Power BI project analyzes financial consumer complaint data to uncover trends in complaint volume, response timeliness, resolution types, and dispute rates. The solution enables users to explore complaint patterns by issue, product, state, and time, while also evaluating the effectiveness of company responses. With key performance metrics like Timely Response %, Disputed Rate, and Resolved at No Cost %, this dashboard provides financial organizations and regulatory stakeholders with meaningful insights to enhance service quality, policy enforcement, and customer satisfaction.

Steps:

1. Imported Data

- Loaded Financial Consumer Complaints from pre-processed CSV format.
- Verified row counts for data integrity.

2. Checked Data Quality

- Opened Power Query Editor.
- Enabled Column Quality, Distribution, Profile.
- Ensured:
 - 100% valid values.
 - 0% errors.
- Transformed data:
 - Converted Date Received and Date Submitted data type to Date format.

3. Created Measures

- Total Complaints** = `COUNTROWS('Financial Consumer Complaints_Financial Consumer Complaints')`
- Timely Response** = `CALCULATE(COUNTROWS('Financial Consumer Complaints_Financial Consumer Complaints'), 'Financial Consumer Complaints_Financial Consumer Complaints'[Timely response?] = "Yes")`
- Timely Response %** = `([Timely Response] / [Total Complaints])`
- In Progress** = `CALCULATE(COUNTROWS('Financial Consumer Complaints_Financial Consumer Complaints'), 'Financial Consumer Complaints_Financial Consumer Complaints'[Company response to consumer] = "In progress")`
- Consumer disputed complaints** = `CALCULATE(COUNTROWS('Financial Consumer Complaints_Financial Consumer Complaints'), 'Financial Consumer Complaints_Financial Consumer Complaints'[Consumer disputed?] = "Yes")`
- Disputed Rate** = `[Consumer disputed complaints] / [Total Complaints]`
- Resolved at no cost total complaints** = `CALCULATE(COUNTROWS('Financial Consumer Complaints_Financial Consumer Complaints'), 'Financial Consumer Complaints_Financial Consumer Complaints'[Company response to consumer] <> "Closed with monetary relief")`
- Resolved at No Cost** = `[Resolved at no cost total complaints] / [Total Complaints]`

4. Created Dashboard

- Added Dashboard Title
- Added Slicers
 - Date Received and Media
- Added Cards to show:
 - Total Complaints
 - Timely Response %
 - Total Complaints In Progress
 - Disputed Rate %

- Resolved at No Cost %
 - Added Stacked Bar Chart to show Total Complaints by Issue
 - Added an ArcGIS Map to show Total Complaints by State
 - Added an Area Chart to show Monthly Trend of Total Complaints
 - Added a Treemap to show Total Complaints by Product
 - Added a Donut Chart to show the percentage of Consumer Disputed
5. **Dashboard Design and Formatting**
- Blue theme background
 - Rounded corners and visual shadows
 - Consistent font and title formatting

Key Findings:

1. Key KPIs

- **Total Complaints:** 75,074 — reflects the overall volume of consumer dissatisfaction or concerns submitted.
- **Timely Response %:** 98.05% — indicates strong responsiveness by financial institutions.
- **Complaints in Progress:** 280 — suggests a small portion of unresolved or ongoing cases.
- **Disputed Rate:** 9.71% — nearly 1 in 10 complaints were disputed by consumers.
- **Resolved at No Cost:** 84.50% — the majority of complaints were resolved without financial compensation, implying that many issues were non-monetary.

2. Total Complaints by Issue (Bar Chart)

- **Top Issues:**
 - *Managing an account* (~8.8K complaints)
 - *Deposits and withdrawals* (~6.1K)
 - *Trouble during payment process* (~3.5K)
- **Insight:** Operational and account handling issues are the most common pain points among consumers.

3. Complaints by State (Map Visual)

- Higher complaint volumes likely observed in populous states like California, Texas, and Florida.
- Geographic mapping helps identify regions requiring better financial service practices.

4. Monthly Trend (Area Chart)

- Complaints peak in **March (7.1K)**, **May (6.9K)**, and **October (6.8K)**.
- Lower complaint volumes in **April** and **January**, possibly due to seasonal factors or reporting lag.
- Trend shows consistent complaint flow across months, indicating ongoing customer issues.

5. Complaints by Product (Treemap)

- **Top Product Categories:**
 - *Credit Card* (~19K)
 - *Checking or Savings Accounts* (~13K)
 - *Mortgage* (~12K)
- **Insight:** Most complaints are concentrated around credit card services and bank account management.

6. % Consumer Disputed (Donut Chart)

- **Disputed by consumers:** 9.71%
- **Not disputed:** 41.27%
- **Missing/NA data:** 49.01%
- **Insight:** A significant portion of records have unreported dispute status, suggesting incomplete follow-up or data gaps.

Conclusion:

The Financial Complaints Dashboard offers a comprehensive and interactive view of consumer feedback trends in the financial services sector. Through powerful visualizations and well-structured DAX measures, users can track complaint outcomes, monitor dispute rates, and assess regional performance. With its intuitive design and data-driven indicators, the dashboard empowers stakeholders to take proactive measures in improving responsiveness, transparency, and customer trust in financial institutions.
