

Project - World Cup Results (1930 - 2014) Dashboard

Introduction:

This Tableau project visualizes historical data from FIFA World Cup tournaments spanning 1930 to 2014. By connecting multiple sheets from the world_cup_results.xlsx dataset, this dashboard delivers insights into championship wins, team performance, hosting history, tournament statistics, and audience engagement across countries and years. Each sheet is crafted to tell a unique part of the World Cup story through bar charts, maps, and tables—empowering stakeholders and fans alike to explore global football trends and historical highlights.

Steps:

1. Load Data:

Loaded data by creating connection with 'world_cup_results.xlsx' containing three sheets.

2. Create Relationship

Created relationships between the 'WorldCups' table and two other tables:

- 'WorldCupsMatches' — linked by the Country field
- 'World Cup - Tableau format' — also linked by the Country field

These relationships help connect data across the tables using the Country as the common key.

3. Sheet 1 - Countries that Won the World Cup

Objective: Show a count of how many times each country has won the FIFA World Cup from 1930 to 2014.

3.1. Formatting

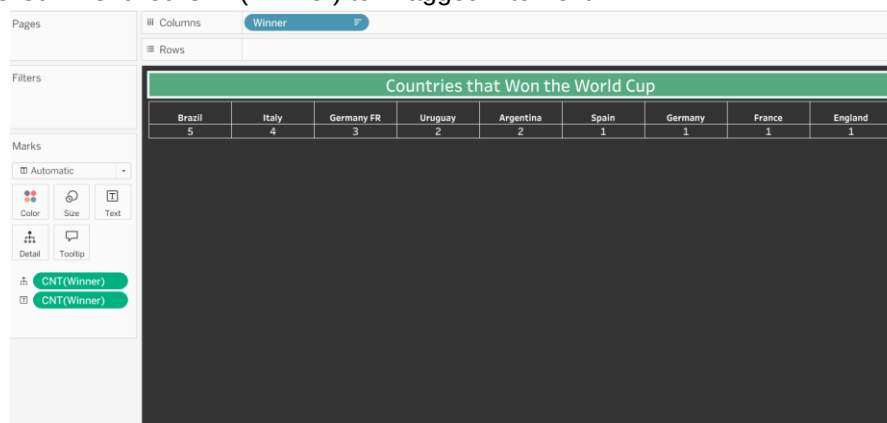

- 3.1.1. Set worksheet background color to black
- 3.1.2. Set title background color to green, font size 15, font color white and alignment center
- 3.1.3. Set all border color to white

3.2. Dragged Fields to View:

- 3.2.1. Columns → Winner

3.3. Configuration:

- 3.3.1. Marks → Automatic
- 3.3.2. Dragged Winner Detail → Measure → Count
- 3.3.3. Ctrl + Clicked CNT(Winner) to Dragged into Text

The screenshot shows the Tableau interface with a table titled 'Countries that Won the World Cup'. The table has columns for the country and the count of wins. The background is black, and the table has a green header and white borders. The counts are displayed in green pills.

Countries that Won the World Cup								
Brazil	Italy	Germany FR	Uruguay	Argentina	Spain	Germany	France	England
5	4	3	2	2	1	1	1	1

4. Sheet 2: Teams by Total Finals and Semi-finals

Objective: Compare how many times each country has reached the semi-finals and finals, highlighting consistent top performers.

4.1. Copied the previous sheet

4.2. Removed all Fields from View

4.3. Created three calculated fields

- 4.3.1. Finals → if [Round] == 'Final' then [Round] END
- 4.3.2. Semi-finals → if [Round] == 'Semi-finals' then [Round] END
- 4.3.3. Zero axis → 0

4.4. Dragged Fields to View:

4.4.1. Columns → CNT(Semi-finals), Sum(Zero axis), CNT(Finals)

4.4.2. Rows → Team → Discrete

4.5. Filters → Round → Final, Semi-Final

4.6. Formatting:

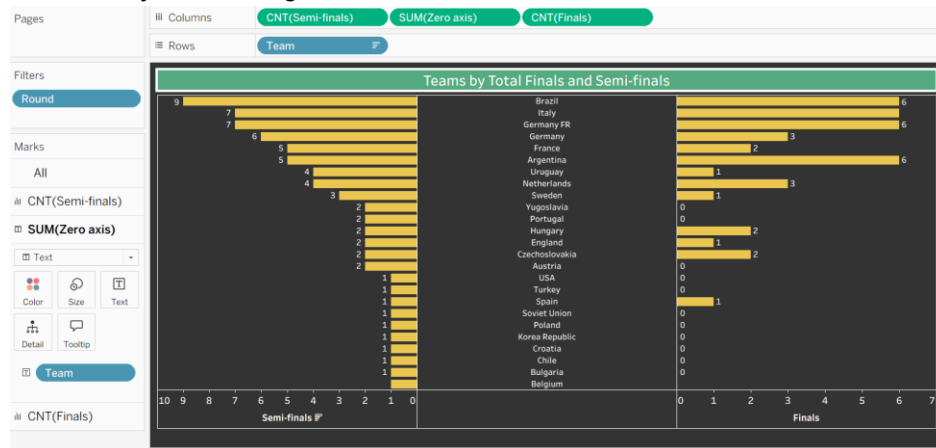

4.6.1. Semi-finals → Edit Axis → Reversed

4.6.2. Zero axis → Dragged Team to Text to show by Team

4.6.3. Changed color

4.6.4. Removed Lines and header

4.6.5. Sorted by descending

5. Sheet 3: Countries that Hosted the World Cup

Objective: Display the number of times each country has hosted the World Cup.

5.1. Copied the previous sheet

5.2. Removed all Fields from View

5.3. Dragged Fields to View:

5.3.1. Columns → Hosting Country → Measure → Count

5.3.2. Rows → Hosting Country

5.3.3. Title → Year → Year

5.4. Formatting:

5.4.1. Sorted into descending

5.4.2. Removed header and titles

6. Sheet 4: Countries Qualified to the World Cup

Objective: Highlight countries by the number of times they have qualified for the FIFA World Cup.

6.1. Copied the previous sheet

6.2. Removed all Fields from View

6.3. Dragged Fields to View:

6.3.1. Columns → Year (World Cup - Tableau format) → Measure → Distinct Count

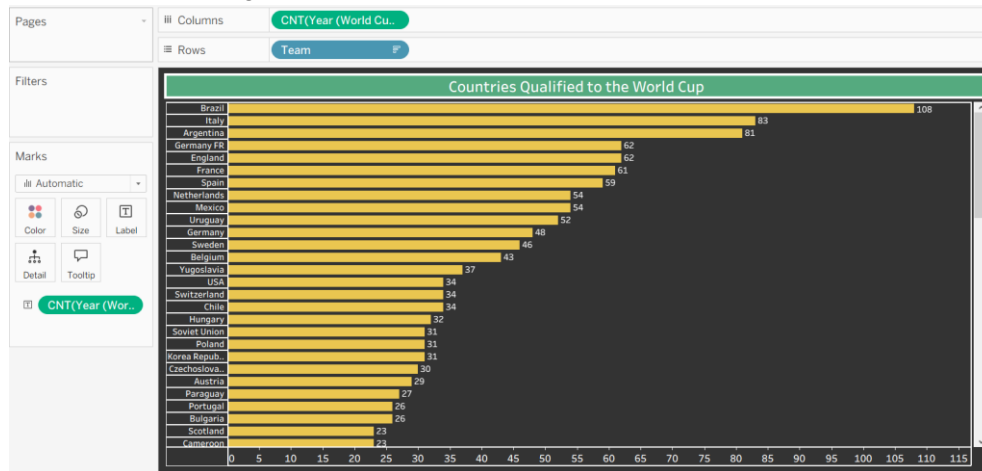

6.3.2. Rows → Team

6.3.3. Label → Year (World Cup - Tableau format) → Measure → Distinct

6.4. Formatting:

6.4.1. Sorted by descending

6.4.2. Removed title, gridlines

7. Sheet 5: Competition Stats by Year

Objective: Analyze yearly trends in tournament metrics like total matches, goals scored, and qualified teams over time.

7.1. Copied the previous sheet

7.2. Removed all Fields from View

7.3. Dragged Fields to View:

7.3.1. Columns → Year (Year) → YEAR(Year) → Discrete

7.3.2. Filters → Measure Names → Goals Scored, Matches Played, Qualified Teams

7.3.3. Rows → Measure Names

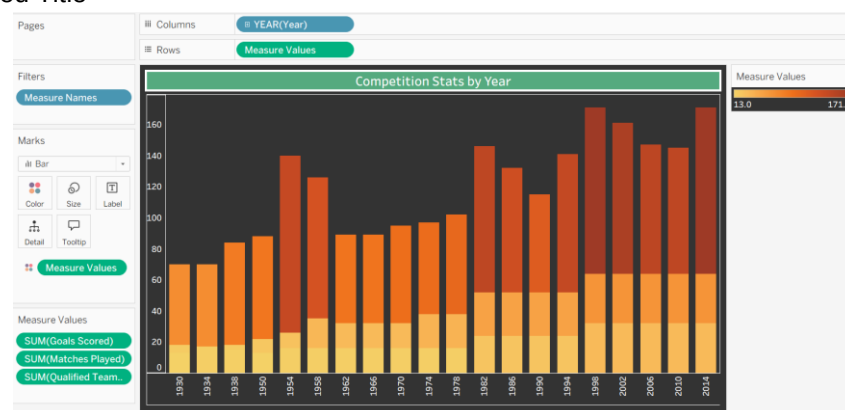

7.3.4. Color → Measure Names

7.3.5. Marks → Bar

7.4. Formatting:

7.4.1. Edited colors of Measure Names

7.4.2. Removed Title

8. Sheet 6: Winners and Top Teams by World Cup Year and Final's Stadium

Objective: Provide a detailed breakdown of each World Cup showing the winner, runner-up, 3rd and 4th place teams, hosting country, and final match stadium.

8.1. Copied the previous sheet

8.2. Removed all Measure Values from View

8.3. Dragged Fields to View:

8.3.1. Columns → Winner, Runner-up, Third, Fourth, Hosting Country, Stadium

8.3.2. Filters → Round (WorldCupMatches) → Final

8.4. Color and Filters:

8.4.1. Shading set as orange

Pages	Rows	Winner	YEAR(Ye. . .)	Runners-Up	Third	Fourth	Hosting Coun.	Stadiums
	Title	Winners and Top Teams by World Cup Year and Final's Stadium						
Filters	Columns							
Round (WorldCupMa...		Winner	Year of F. B.	Runners-Up	Third	Fourth	Hosting Country	Stadiums

9. Sheet 7: Map - Audience by Country and Year

Objective: Display audience attendance geographically by country and year, offering insights into regional fan engagement.

9.1. Copied the previous sheet

9.2. Removed all Fields from View

9.3. Dragged Fields to View:

9.3.1. Rows → Latitude

9.3.2. Columns → Longitude

9.3.3. Marks → Map

9.3.4. Color → Attendance

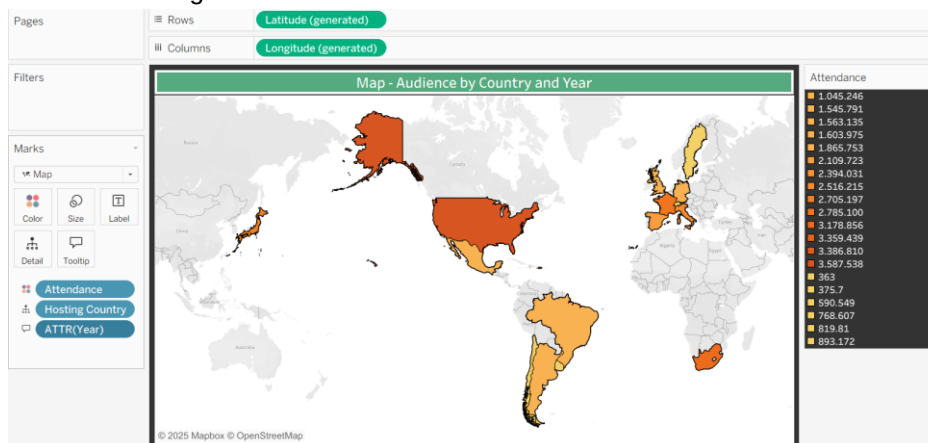

9.3.5. Details → Hosting Country

9.3.6. Tooltip → Year → Attribute

9.4. Formatting:

9.4.1. Edited colors of Attendance

9.4.2. Removed Legends

10. Dashboard

10.1. Set customize size 1850X1050

10.2. Set background color to black

10.3. Placed all the sheets to the dashboard

10.4. Added logo of World Cup Trophy

10.5. Added two Text for title 'World Cup Results' and subtitle '1930 - 2014'

Key Findings:

- Brazil is the most successful country with 5 World Cup wins, followed by Italy (4) and Germany FR (3).
- Germany and Brazil have been the most consistent participants, each qualifying for the World Cup over 60 times.
- Mexico, Italy, Germany, France, and Brazil have each hosted the World Cup twice.
- A steady increase is observed in the number of matches, goals, and participating teams, especially after 1970, indicating the tournament's expansion and popularity.
- Attendance data shows that World Cup matches in countries like the USA, Brazil, and Germany attracted some of the largest audiences.
- The visual breakdown of finals and semi-finals shows teams like Brazil, Italy, Germany FR, and France consistently reaching advanced stages.

Conclusion:

This Tableau dashboard successfully consolidates and visualizes over 80 years of FIFA World Cup data. It uncovers patterns in championship wins, highlights consistent top-performing countries, and captures the evolving scale of the tournament. Through spatial and temporal visuals, users can explore the growth, reach, and impact of the World Cup globally. Whether for analysts, fans, or historians, this project provides an engaging and data-rich exploration of the world's most celebrated football tournament.
